## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-27 are allowed.

As per claims 1-27, specifically independent claims 1, 10 and 19, the prior art of record fails to teach or adequately suggest a computer implemented method and system for tapering a transition period of a transition between a first and second control model, in combination with the other claimed features and or limitations.

The examiner was able to find several references which taught that several models may be used to control a dynamic system which has several regions of operations, but the examiner was not able to find any particular reference that disclosed a tapering step when transitioning from one model to another, when switching between these different regions of operations.

As the applicant has already explained, this allows for a smooth transition between the regions of operations and allows for the system to not be adversely affected from vibration being contributed due to the switching of operating regions, and this concept does not appear to be taught by the prior art of record.

### ***Conclusion***

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald D. Hartman Jr. whose telephone number is (571) 272-3684. The examiner can normally be reached on Mon.-Fri., 11:00 - 8:30 pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Knight can be reached on (571) 272-3687. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
